Hi all,

we're in a Windows 2003 environment. The check-mark for the inheritable permissions is getting un-checked for the users even though, I made the check-mark earlier. If you go to the AD > User Properties > Security tab > Advanced > under the Permissions tab, I put a check-mark next to "Allow inheritable permissions from the parent to propogate to this object and all child objects. Include these with entries explicitly defined here."

Why does the check-mark keeps disappearing after like 20 min.? Any ideas?

Please let me know. Thank you!
