Hi

I agree with jorge this is probably the adminsSDholder, and the security is reseted evry 1h and not 20mint.

"needlittlehelpwithSMS" <needlittlehelpwithSMS@xxxxxxxxxxxxxxxxxxxxxxxxxxxx> wrote in message <news:3C41D0CE-4E03-480D-A5B8-68B37C1528A3@xxxxxxxxxxxxxxxxxxxx>

Hi all,

we're in a Windows 2003 environment. The check-mark for the inheritable permissions is getting un-checked for the users even though, I made the check-mark earlier. If you go to the AD > User Properties > Security tab > Advanced > under the Permissions tab, I put a check-mark next to "Allow inheritable permissions from the parent to propogate to this object and all child objects. Include these with entries explictly defined here."

Why does the check-mark keeps disappearing after like 20 min.? Any ideas?

Please let me know. Thank you!
