- 

I would check out the object:

CN=cstjohn444,OU=2000,OU=Students,OU=1016485,OU=Primary,DC=XXXXXX,DC=XXXXXX,DC=net

See if there are large numbers of certificates or proxy addresses associated with this user. If there are clean it up and see if this helps.

I haven't see this before but from reading others with similar issues it sounds like this could be the issue.

Folks – any help would be greatly thanked

I have one server on the domian (out of more than 1000) that is  
experienceing the following events

Event Type: Error  
Event Source: NTDS ISAM  
Event Category: (14)  
Event ID: 623  
Date: 16/05/2007  
Time: 17:26:12  
User: N/A  
Computer: XXXXXXXX-DC02  
Description:  
NTDS (552) NTDSA: The version store for this instance (0) has reached its

Re: Event ID 623

maximum size of 103Mb. It is likely that a long-running transaction is preventing cleanup of the version store and causing it to build up in size.

Updates will be rejected until the long-running transaction has been completely committed or rolled back.

Possible long-running transaction:

SessionId: 0x038508C0

Session-context: 0x00000000

Session-context ThreadId: 0x00000274

Cleanup: 1

For more information, see Help and Support Center at

<http://go.microsoft.com/fwlink/events.asp>.

Event Type: Error

Event Source: NTDS SDPROP

Event Category: Internal Processing

Event ID: 2008

Date: 16/05/2007

Time: 17:26:12

User: NT AUTHORITY\ANONYMOUS LOGON

Computer: XXXXXXXX-DC02

Description:

Internal error: The security descriptor propagation task encountered an error while processing the following object. The propagation of security descriptors may not be possible until the problem is corrected.

Object:

CN=cstjohn444,OU=2000,OU=Students,OU=1016485,OU=Primary,DC=XXXXXX,DC=XXXXXX,DC=net

Additional Data

Error value:

-1069 JET\_errVersionStoreOutOfMemory, Version store out of memory (cleanup already attempted)

Internal ID:

2080495

For more information, see Help and Support Center at

<http://go.microsoft.com/fwlink/events.asp>.

Event Type: Error

Event Source: NTDS Replication

Event Category: Replication

Event ID: 1479

Date: 16/05/2007

Time: 17:26:12

User: NT AUTHORITY\ANONYMOUS LOGON

Computer: XXXXXXXX-DC02

Description:

Active Directory could not update the following object on the local domain

Re: Event ID 623

controller with changes received from the following source domain controller.  
Active Directory does not have enough database version store to apply the changes.

Object:

DC=..SerialNo-XXXXX-DC01.XXXXXL.XXXXX.net\0ADEL:6946709d-8c5b-4e47-8c87-98fd3efbdac7

Object GUID:

6946709d-8c5b-4e47-8c87-98fd3efbdac7

Source domain controller:

d98c11a8-a297-437d-a2af-7b7decbfafc1.\_msdcs.XXXXX.net

User Action

Restart this domain controller. If this does not solve the problem, increase the size of the database version store. If you are populating the objects with a large number of values, or the size of the values is especially large, decrease the size of future changes.

Additional Data

Error value:

8573 The database is out of version store.

For more information, see Help and Support Center at <http://go.microsoft.com/fwlink/events.asp>.

Event Type: Error

Re: Event ID 623

<http://go.microsoft.com/fwlink/events.asp>.

The server is Windows 2003 – the domain and forest functionality is 2003 –  
The server does not run Exchange

Any Ideas anyone?

Regards
