It's a user account ... not the domain admin account ...

I found the complete error on one DC:

Event Type: Error

Event Source: SAM

Event Category: None

Event ID: 12294

Date: 6/19/2007

Time: 10:02:32 AM

User: MyDom\ClientCN504

Computer: CNDC002

Description:

The SAM database was unable to lockout the account of ClientCN504 due to a resource error, such as a hard disk write failure (the specific error code is in the error data) . Accounts are locked after a certain number of bad passwords are provided so please consider resetting the password of the account mentioned above.

For more information, see Help and Support Center at

<http://go.microsoft.com/fwlink/events.asp>.

Data:

0000: a5 02 00 c0 ¥..À

Any idea?

Hi
Please post the EventID, Source and exact error, also refer to the used OS
and Server/role.
check if this help
<http://support.microsoft.com/kb/306091/en-us>

Hi,

time by time we got the following Error for different User
accounts:

The SAM database was unable to lockout the account of
CN504 due to a
resource error, such as a hard disk write failure (the specific
error
code is
in the error data) . Accounts are locked after a certain
number of bad
passwords are provided so please consider resetting the
password of the
account mentioned above.

Do you know a solution for this error?

thanks

Juan
