> You can set the password policy only on domain level, not on OU's. With server 2008 this will be possible.

You actually don't link the "Password Policy" (then called "Password Setting Objects − PSOs) to OUs in Windows Server 2008 AD DS − you'd assign them to users or global groups (and inetOrgPerson objects in AD). Nevertheless, the Default Domain Password Policy remains, afaik.

I managed to confuse that first, too ;)

cheers,

Florian
