Dear Ace:

Thanks alot for your concern ,I was able to solve the problem by disjoining the computers from the domain and rejoin them ,it kept first saying (Access Denied) ,but I created new computers accounts on the DC for the affected machines ,disjoined them completely then added the MARINADC in the DNS suffix tab ,restarted the computer then typed the name of the domain as follows: MARINA.DC not MARINADC ,an authentication dialo apperared ,I supplied the necessary credentials and then the message (Welcome to MARINA.DC domain) magically appeared!

Now all I need to know is why that happened in the first place and how to avoid it in the future ,so I guess i will answer all of your question.

The ipconfig /all's are incomplete unless you just did an ipconfig? If

possible, It would have been greatly helpful to see the full output which provides much more additional information concerning your basic AD infrastructure config, what DNS they are using, and other info. Also let us know what the AD DNS domain name is please.

Microsoft Windows XP [Version 5.1.2600]
(C) Copyright 1985-2001 Microsoft Corp.

```
C:\Documents and Settings\axxxxxxiz>ipconfig?  
'ipconfig?' is not recognized as an internal or external command,  
operable program or batch file.
```

```
C:\Documents and Settings\axxxxxiz>ipconfig/all
```

Windows IP Configuration

```
Host Name . . . . . : Axxxxxxxz  
Primary Dns Suffix . . . . . : MARINADC  
Node Type . . . . . : Unknown  
IP Routing Enabled. . . . . : Yes  
WINS Proxy Enabled. . . . . : No  
DNS Suffix Search List. . . . . : MARINADC
```

Re: Unable to browse shared folders on DC

Ethernet adapter Local Area Connection 3:

Connection-specific DNS Suffix . :
Description : SiS 900 PCI Fast Ethernet
Adapter
Physical Address. : 00-E0-06-09-01-C8
Dhcp Enabled. : No
IP Address. : 192.168.1.52
Subnet Mask : 255.255.255.0
Default Gateway : 192.168.1.4
DNS Servers : 192.168.
