do you want to delegate the movement of computer objects between OUs? if yes then the following is at least needed:

to be able to move a computer object from "<OU SOURCE>" to "<OU TARGET>"

DACL on <OU SOURCE> OU for <AD group> ---> Allow Delete Computers Objects applying to This object and all child objects & Allow read(RP)/write(WP) name applying to computer objects & Allow read(RP)/write(WP) Name applying to computer objects

DACL on <OU TARGET> OU for <AD group> ---> Allow Create Computer Objects applying to This object and all child objects

--

Cheers,
(HOPEFULLY THIS INFORMATION HELPS YOU!)

I have some computer OU in the windows 2003 domain.

Re: Delegate user to add/remove computers to specified OU

Is there a way to Delegate a user/group to add/remove computers to specified computer OU in AD?
