Hello!

Can i make a trusted domains without merging tree when the 1st domain is main.domain.com and the 2nd domain is test.main.domain.com?

I.e. can exists main.domain.com and test.main.domain.com like a different domains but with trusts between?

P.S. I'm not trust admins from the main domain and didn't want give them whole rights on my test.main.domain.com.

Thanks!

.
