Hello Bob,

How To Delegate the Unlock Account Right:
<http://support.microsoft.com/kb/294952/en-us>

Best regards

Hello,

Can you please help me find settings in AD for Windows Server 2003 to allow one of my domain user containers to have admin rights to let them use the AD User snap-in on their XP workstation to reset passwords and unlock users?

At the moment user in this container have the ability to reset the password but if the account is locked they cannot uncheck the "unlock account" item as it is grayed out. I have tried to apply the setting in ADSI for Password LockoutTime read and write but it is not working. That is, I tried to follow the advice of "method 2" in this article <http://support.microsoft.com/kb/279723>

Also I would like these users to be able to rename domain member workstations.

Thank you for any advice you can give me.
-Bob
