Hi, I've been looking at that but it doesn't say inbound or outbound. I have added these ports from LAN to Server subnet and it works, but surely I need something from Server subnet to LAN?

Thanks

Hello cyborg,

Give this a go:  
<http://support.microsoft.com/kb/555381>

Best regards

Hi,

All our servers are on their own subnet, however there will be a firewall installed between the servers subnet and the LAN users. Can someone list the UDP/TCP required and weather inbound or outbound to and from the LAN?

I can only think inbound from LAN to the server subnet need to be opened?

Thanks
