-

additional domains in the same AD forest DO NOT give you any ADDITIONAL security.

The AD forest is THE SECURITY BOUNDARY.

To add to what I already said: *ANY* member of a Domain Admins group *MUST* be trusted in what he does with his account. If you *DO NOT* trust that person, *DO NOT* make him/her a member of the Domain Admins groups

Why? Domain Admins can *misuse* the powers of a DC. That's why!

The answer: check what those people *REALLY* need to do and implement a solution based upon that
--

Cheers,
(HOPEFULLY THIS INFORMATION HELPS YOU!)
