dear Ramon,

we have two Dell Poweredge 2650 with 2x2.2GHz Xeon connected with a POWER VAULT PV220S.

the SCSI cards are Adaptec 39160

the public NIC is a 1Gb Broadcom nextreme used for all communications fix IP

the private NIC is a Intel Pro/100 S server used as internal cluster use

only fix IP

the share has been configured from Cluster admin.

the message from the event viewer is:

Event Type: Error

Event Source: Application Hang

Event Category: (101)

Event ID: 1002

Date: 5/12/2004

Time: 4:48:20 PM

User: N/A

Computer: HQ50

Description:

Hanging application CluAdmin.exe, version 5.2.3790.0, hang module hungapp, version 0.0.0.0, hang address 0x00000000.

microsoft.public.windows.server.clustering: Re: When a node fail I lost shared folders

after this error I'm not be able to run cluster admin and I should power off the server.
