Shhhhh. I get paid a lot of money to tell customer to do just that!

Cheers,

Rodney R. Fournier

Hi there,

We're running into a problem with our three-node Windows 2003 x64 SP2 R2 cluster running SQL Server 2005 SP2. Initially everything was running fine and we could switch databases to other cluster nodes without any problem. After those tests we extended some

Re: Volume cannot be switched after extending volumes using diskpart

volumes on
the three nodes using diskpart. After that we cannot switch
those
extended volumes to other nodes as where the volume was
extended.

Somebody any idea?

Kind regards,
Jan Schulenburg
Oad Reizen B.V.

Extra information: after restarting the target nodes switching is
possible!
