On the Zone transfer button there is a notify button, click the button and set it to notify the IP addresses of the secondaries. Then if you want to initiate a zone transfer from the master increment the zone serial and it will notify the sendary servers to do a zone transfer, it could take 30 min or so for it to happen but usually the secondary will connect immediately.

Use Outlook Express?... Get OE\_Quotefix:

It will strip signature out and more

<http://home.in.tum.de/~jain/software/oe-quotefix/>

=====

Keep a back up of your OE settings and folders with OEBackup:
