Yes we have a wins server. Would this just be the setting " Domain Name" under DHCP options?

Thank you

Do you have WINS? Or setup DNS suffix.

DNS suffix for VPN connection

Setup DNS suffix for the VPN connection. Q: I have used CMAK to distribute a VPN connection to all those who require it. All works well, including the proxy ...

I have a Dns server and when I am on the LAN I can use nslookup "host name"

and everything works great. When I VPN in nslookup "host name no longer works" I must do a command that includes the FQDN. any one know why?

TIA
