Hi

You could built your own logon/logoff tracking using logon/logoff scripts, more here:

<http://groups.google.com/groups?selm=%23fbVFntuDHA.3116%40tk2msftngp13.phx.gbl>

There are tools out there that can help you (with an agent installed on every computer), I think the two products below should be able to give you the information you want:

UserLock

<http://www.softwareshef.com/products/display.asp?p=42>

Microsoft's solution:

You could install the CCONNECT Microsoft Resource Kit utility onto every computer, it is in the Win2k Server Resource Kit, Supplement 1 (pay ware, and you will need a SQL server database as well).

More about CCONNECT here:
