Hi,

If this describes your problem, call Microsoft and request the patch mentioned in this article. They will not charge you for this (they will give it to you) as long as this patch is the only thing you request (no additional support).

You may not be able to paste an item in an Office 2003 program after you connect to a Windows Server 2003-based server that is running Terminal Server

<http://support.microsoft.com/default.aspx?scid=kb:en-us:840872&Product=winsvr2003>
