Hi,

>Check the Group Policy (*gpedit.msc*) and make sure that

batch  
>job.

I checked the computer and the user configuration. Under both configurations I found this:

- Hide Property Pages
- Prevent Task Run or End
- Prohibit Drag-and-Drop
- Prohibit New Task Creation
- Prohibit Task Deletion
- Hide Advanced Properties Checkbox in Add Scheduled Task Wizard
- Prohibit Browse

All of this settings are set to: Not Configured.

Chris
