Hi Mark,

I am a little unclear about this issue.

How did you migrate a group of 20 xp pro computers from a novel work group to a windows 2003 sever with roaming profiles?

What kind of icons disappear after reboot? For example, if you have placed Office icons on the desktop, if the icon disappear, can you start the program from Start menu?

I suggest you refer to the following article to perform a clean boot of windows XP to narrow down this issue:

Q310353 How to Perform a Clean Boot in Windows XP
<http://support.microsoft.com/support/kb/articles/q310/3/53.asp>

HTH!

Best regards,

Rebecca Chen
