Here is the script that you can deploy it on the workstations to require them to change password:

```
"Set objUser = GetObject _  
("LDAP://CN=myerken,OU=management,DC=Fabrikam,DC=com)
```

```
objUser.Put "pwdLastSet", 0  
objUser.SetInfo"
```

IF THAT WHAT DID YOU WANT, PRESS ON THE YES BUTTON BELOW :)

Regards,
