Hi John,

Here is a list of default permission on Windows 2000

Default NTFS Permissions in Windows 2000

<http://support.microsoft.com/default.aspx?scid=KB:EN-US:Q244600&ID=KB:EN-US:Q244600>

For Windows XP and Windows 2003 (not sure about Windows 2000) there are some templates called security templates that you can use to reapply the permissions on the drives... Template that you need to look for and reapply is "System root security (Rootsec.inf)"

How to apply predefined security templates in Windows Server 2003

<http://support.microsoft.com/default.aspx?scid=kb:en-us:816585>

Predefined security templates

[http://www.microsoft.com/resources/documentation/windows/xp/all/proddocs/en-us/sag\\_scedefaultpols.msp](http://www.microsoft.com/resources/documentation/windows/xp/all/proddocs/en-us/sag_scedefaultpols.msp)
