

Userenv Error 1504 – Cannot update roaming user profile

Source:

<http://www.tech-archive.net/Archive/Windows/microsoft.public.windows.server.general/2006-06/msg00878.html>

- *From:* "mmileto" <mmileto@xxxxxxxx>
 - *Date:* 21 Jun 2006 22:28:56 -0700
-

I've searched Groups time and again for anything that could help me....NOTHING

This error seems to be a little unique from all other 1504 errors I have searched. I have 2 errors:

UserenvEvent Type: Error
Event Source: Userenv
Event Category: None
Event ID: 1504
Date: 6/21/2006
Time: 7:40:18 PM
User: USMANDT\mmileto
Computer: USMT-TRMSRV2
Description:

Windows cannot update your roaming profile. Possible causes of this error include network problems or insufficient security rights. If this problem persists, contact your network administrator.

DETAIL – The operation completed successfully.

For more information, see Help and Support Center at <http://go.microsoft.com/fwlink/events.asp>.

Event Type: Error
Event Source: Userenv
Event Category: None
Event ID: 1504
Date: 6/21/2006
Time: 5:46:23 PM
User: USMANDT\lhuffman
Computer: USMT-TRMSRV2
Description:

Windows cannot update your roaming profile. Possible causes of this error include network problems or insufficient security rights. If this problem persists, contact your network administrator.

Userenv Error 1504 – Cannot update roaming user profile

DETAIL – The process cannot access the file because it is being used by another process.

For more information, see Help and Support Center at <http://go.microsoft.com/fwlink/events.asp>.

I've verified:

- Permissions on NTFS root and share permissions
- No DNS errors/issues
- Authenticated users have 'Read' and 'Apply Group Policy' permissions on all GPO's
- Have UPHCLEAN installed on Windows 2003 Terminal Servers
- Have Userenv logging enabled

I've tried everything I can think of. I've even tried rejoining servers to the domain, etc, etc...

Logging into TS's I have no problems, no errors. If I reboot the fileserver and/or TS's log off is okay as well – no errors – at the first log off. However, at every sequential log off I get the errors and when users log into and out of other TS's same errors occur.

The USMANDT\mmileto account is my account – a domain admin account – and it still gives me the same errors.

Please help!

Userenv logging gives me clues but don't know where to start:
