Hi Adrian,

Here is step-by-step guide for the upgrade:

How to upgrade Windows 2000 domain controllers to Windows Server 2003

<http://support.microsoft.com/default.aspx?scid=kb:en-us:325379>

Also a good read:

Common Mistakes When Upgrading a Windows 2000 Domain To a Windows 2003 Domain

<http://support.microsoft.com/default.aspx?scid=kb:en-us:555040>

You can check hardware and software compatibility by running

```
winnt32 /checkupgradeonly
```

from Windows Server 2003 installation CD.

Here is some more information on Hardware compatibility

Note: my advice for the upgrade is to do a clean installation of new Windows Server 2003

hi all,

Do microsoft a tool to check for Hardware conflicts from 2000 – 2003 server,

Re: 2000 – 2003 Upgrade

kinda like one for Vista?

Also does anyone know of any step by step guides for upgradeing a 2000 domain to 2003 server?

Thanks
