Hello Jorge,

Use the ISA server:

<http://www.microsoft.com/isaserver/default.mspix>

Best regards

myweb

Hello

My question maybe very simple, but because i need a other opinions.

My costumer have a Windows 2003 Server, with more than 70 Users (>45 Computers + 5 Terminal), he needs tocontrol de internet acess, see who is on

the internet, control by time(hour) the acess, block some URL, control MSN,

and permit or not the acess to the internet, has well not allow the users

that are not logged in

Anyone can help me, choosing the best Microsoft Platoform to do this

Thank's

Jorge Lopes
