Don't know that there is a policy but it's the Reg\_Sz string "Wallpaper" found at;

HKEY\_USERS\DEFAULT\Control Panel\Desktop

<http://www.microsoft.com/technet/prodtechnol/windows2000serv/reskit/regentry/93214.msp>  
<http://www.microsoft.com/technet/prodtechnol/windows2000serv/reskit/regentry/93239.msp>

If they don't exist then ADD them.

How does on set a wallpaper for the login screen?

Ideally, I would like to set this on the server as a group policy, so that all computers on the network will use the same wallpaper available on a share.

I do not want to prevent users from setting their own wallpaper in their environment, just what appears when no user is logged on.

.
