Hey Vicky,

2. Yes it comes with security configuration wizard

1, 3, please refer to the post by CreateWindow

Never Installed SBS before. Will be doing so in a few days from now.
Just few queries

- 1] Will SBS use a Unique Service Pack.
- 2] Does SBS std edt has a buit in Security Configuration Wizard to harden the server
- 3] How is the exchange DB & Log file stored – any recommendation?
