hi

when i try and install the update for KB927891 it tells me i do not have permission to update server 2003

which is the problems I am having applying updates

"Coraleigh Miller" wrote:

Hi Leonard,

Are you installing SP2 via Windows Update or did you manually download the full SP and then try and run it?

If done via Windows Update...

Try deleting all the files within the Windows/Software Distribution/Downloads folder and then try again.

Try and manually download the full SP2 to install instead.

This is the newest update to the Windows Update Agent you could try installing.. <http://support.microsoft.com/kb/932494>

Also this is an update to address Windows Update issues.. <http://support.microsoft.com/kb/927891>

I am trying to loa server 2003 SP2 on my exchange 2003 machinewhen I check the logfile i get the an error "Update.exe extended error code = 0xf200"

Re: server 2003 SP2

also i get a box pop up telling me "you do not have permission to update windows server 2003. please contact your system administrator"

I have just updates my other server 2003 box fine can you please help
