Thanks for the suggestion, but if I do that won't the workstation lose all its configuration settings when it re-joins the domain?

"Meinolf Weber" wrote:

Hello David,

Remove the workstation with the problem from the domain to workgroup, reboot and add it again to the domain.

Best regards

No, only Windows Server 2003 and Windows XP. nothing else!

"Meinolf Weber" wrote:

Hello David,

And you have no MAC's or UNIX clients in the network?  
Because a lot  
of articles are mentioned for this error with them.

Best regards

no rights.

Yes, we have a very simple domain with one DC and three domain member clients, all of which are running Windows XP. Only one client seems to cause the problem.

"Meinolf Weber" wrote:

Hello David,

Is that client a domain member?

Best regards

The following warning event 2510 has suddenly started appearing exactly every 12 minutes in my Windows Server 2003 DC system log:  
"The server service was unable to map error code 1355" at the same time as this, four entries appear in
