Hi

I have a dual boot option in my laptop , one for xp and windows server 2003 , i am able to log on to xp perfectly but when i try to login in 2003, after entering a the username and password , i just get a blank screen , i tried booting in to all the modes (safe mode, with networking , command prompt ,lkgc) but still the problem persists .

Please let me know what should be done in this regard

Thanking you in advance

Regards

srini
