Hi − please see the reply to your similar post in the Exchange 2000 group. In the future, please don't multipost − if you need to post to multiple groups, it's best to crosspost instead, by posting a single message to a handful of relevant groups (separate the NG names with commas) so that everyone can follow the thread. Multiposting wastes everyone's time, including yours, and may lead to your actually getting *less* help rather than more.

See http://www.blakjak.demon.co.uk/mul_crss.htm

.
