Hello Clayton,

If the machine was connected to the domain, you can login also without network connection using the cached credentials on the local machine. Choose also the domain name like you logon at work.

Best regards

Meinolf Weber

Hello Clayton,

Is it a standalone server or domain controller? How do you login to the server/domain, with a normal XP or 2000 or with Remote desktop at the server itself?

Best regards

Meinolf Weber

I have a profile at work and I logon to Windows 2000 server,  
is  
there a way I can logon to my profile at home?

Thanks
