Hi Delf,

If you use the ADMT to migrate the users from one domain to another domain, the user profile will not be change.

When this finishes, the user can logon the new domain and the system still uses the original user profile.

For how to use the ADMT, you can refer to the following articles:

325851 HOW TO: Set Up ADMT for a Windows NT 4.0-to-Windows Server 2003 Migration

<http://support.microsoft.com/?id=325851>

326480 How to Use Active Directory Migration Tool Version 2 to Migrate from

<http://support.microsoft.com/?id=326480>

260871 HOW TO: Set Up ADMT for Windows NT 4.0 to Windows 2000 Migration

<http://support.microsoft.com/?id=260871>

If you encounter any problem about the ADMT migration, please feel free to post here. We will continue to help you.

Thanks for using Microsoft Newsgroup!

Sincerely,

Steven Liu [MSFT]
