Hi Joseph,

Thanks for posting!

Do you mean the SNW 5.03 as the Microsoft Services for NetWare 5.03? We usually say SFN 5.03.

<http://www.microsoft.com/windowsserver2003/sfn/default.mspx>

Services for NetWare 5.03 is a free download which includes the following two tools, which simplify the adoption of Windows Server 2003, reduce overall network administration, and facilitate the migration to Windows Server 2003 from NetWare, NDS and eDirectory:

- Microsoft Directory Synchronization Services (MSDSS).
- Microsoft File Migration Utility.

Here is the supported Operating Systems by this service:
Windows 2000 Service Pack 4, Windows Server 2003, Windows XP

You may use the Microsoft File Migration Utility to migration the Files from the NetWare to the Windows Server 2003.

It is not a tool to create a mapped drive.

Here are more information regarding the migration from Netware to Windows Server 2003:

NetWare to Windows Server 2003 Migration Planning Guide
<http://www.microsoft.com/windowsserver2003/techinfo/overview/sfnmig.mspx>

Hope this helps.

Best Regards,
