When i access resource in NT4 domain with migrated account, migrated account will be presented with the SID of NT4 domain. NT4 domain controller will not filter any SID because there is no QuarantinedDomains registry key on the PDC. I get access to all the resource with SID History. why do i need to disable sid filtering on w2k3 domain controller?

I DID NOT DISABLE SID FILTERING ON W2K3 DC, STILL i CAN ACCESS ALL THE RESOURCES IN NT4 DOMAIN WITH THE MIGRATED ACCOUNT.
