Hi Frances,

Many thanks for that. I managed to resolve the problem this morning. The problem was that I had specified an export file name of child.mydomain.co.uk.Ou.ldf – which clearly appears to be incorrect. So I amended it to mydomainOu.ldf

It really is amazing because sometimes these errors can stare you right in the face and you won't find them so easily :-s

All seems fine now :-)

Regards,  
Shaun
