Hello,

Thanks for your post.

Based on your description, I have some questions regarding to your plan.

1. Do you plan to eventually remove win2k old domain? If so, creating a new forest with win2k3 server would be a good idea. If win2k old domain will permanently serve in the network, you may consider joining win2k3 new server in the same forest as win2k old domain is.
2. What is the external user mean? Do you mean those external users which are located to another physical location whereas their accounts exist in win2k domain? Do you plan to let those external users still logon to the win2k old domain?
3. What is the meaning of "How do I make sure that the Citrix box will authenticate users from the OLDDOMAINNAME but still have access to files on the file server (dc1.newdomain.private)"? The NT BDC can authenticate with the external users and those external users can access the file server (dc1.newdomain.private)"?
4. Is there any particular reason for those external user to authenticate with BDC instead of the new win2k3 DC?

In addition, this question appears to be more consulting in nature and if this is an urgent issue, you may consider contacting CSS or advisory services.

1. Contact Microsoft Customer Support Services (CSS) via telephone and a dedicated Support Professional can assist you. Please be advised that contacting phone support will be a charged call.

To obtain the phone numbers for specific technology request please take a look at the web site listed below.

<http://support.microsoft.com/default.aspx?scid=fh:EN-US:PHONENUMBERS>

If you are outside the US please see <http://support.microsoft.com> for

RE: Restructure Domain Plan:

regional support phone numbers.

2. Advisory Services is a remotely delivered, hourly fee-based, consultative support option that provides a comprehensive result beyond your break-fix product maintenance needs. It is an hourly fee-based, consultative support option that provides proactive support beyond your break-fix product maintenance needs. This support option includes working with the same technician for assistance with issues like product migration, code review, or new program development and so on.

For more info in the US and Canada:

<http://support.microsoft.com/default.aspx?pr=AdvisoryService>

Outside of the US/Canada:

<http://support.microsoft.com/default.aspx?scid=%2finternational.aspx>

Thanks for your understanding.

Thanks & Regards

Amanda Wang [MSFT]
