I have read all of those. I am asking for someone who has real world experience with these tools. How long of a maintenance window is required?

Hello,

Thanks for posting!

Before migration I suggest you review the following article for reference:

Microsoft File Server Migration Toolkit FSMT Site:

<http://www.microsoft.com/windowsserver2003/upgrading/nt4/tooldocs/msfsc.mspx>

Overview of the Microsoft File Server Migration Toolkit white paper of FSMT

http://www.microsoft.com/windowsserver2003/upgrading/nt4/tooldocs/msfst_overview.mspx

Frequently Asked Questions About File Server Migration

http://www.microsoft.com/windowsserver2003/upgrading/nt4/tooldocs/msfst_faqs.mspx

Hope the information helps.

Best Regards,

Jason Tan

| In reading the documentation for the FSMT, it says that I must provide a
| maintenance window when I can rename the old file servers. I'm in the
| planning stage and I'm trying to determine how much of a window do I
| need.
| How long after renaming the servers and running the Consolidation Root
| Wizard
| will it take before users can access the file servers by legacy UNC paths?
|
| I have a lot of data to migrate to dfs and I need to minimize the impact
| on
| the users. We are a 24/7 operation with very small maintenance windows.
| Thanks for any help.
