I which it was that simple.
:>
Its not a cluster and the
source only had a single nic.
It was

actually

a

desktop class unit uses as a
w2k sp4 file and print
server. The

destination

RE: FSMT Fatal error – Non cluster – Src Win2k SP4 DC to Win2K3 SP

RE: FSMT Fatal error – Non cluster – Src Win2k SP4 DC to Win2K3 SP

server does have dual nics,
but is not in a cluster. The
server does

have

W2K3 R2.

I have used the tool to move
files successfully to this
server so I

think

its the source and not the
host. It seems to me that it
may be a

character

used in the paths that can't
be parsed. Is that possible?

Are there any other test I
can try?

Tks

"Vincent Xu [MSFT]"
wrote:

Hi,

Pleaes
check if you
have
multiple
NIC. If you
do have,
please

uncheck

File

and Print
sharing and
client for
Microsoft

RE: FSMT Fatal error – Non cluster – Src Win2k SP4 DC to Win2K3 SP

RE: FSMT Fatal error – Non cluster – Src Win2k SP4 DC to Win2K3 SP

on
unnecessary
NIC.

Based on
my
research, it
seems to
this issue
often
happened
on

cluster

server, does
this accord
with your
situation?If
you try to
migrate

shared

folder to a
cluster
server, it
seems to be
a bug and it
was fixed

in

Windows
2003 R2.

Hi
Vincent.

I
tried
this
on
another
server.
Windows
2000
SP4
Member

server

and I

get

the

same
error

RE: FSMT Fatal error – Non cluster – Src Win2k SP4 DC to Win2K3 SP

13

as
stated
in
the
above
post.

Is
it
having
issues
with
a
special
character
in
a
file
or

folder

path.

Our

users
user
&
in
many
folder
and
file
names.

Is
there
plans
for
a
new
updated
version
of
this
tool.
When

it

RE: FSMT Fatal error – Non cluster – Src Win2k SP4 DC to Win2K3 SP

works

its

great.
We
have
500
G
of
data
to
copy
and
this
tool
would

make

live

much

easier.

PS.
I
sent
the
logs
as
requested,
but
did
not
receive
a

response.
