Hi,

Glad to hear you found a workaround. :)

Have a good day!

Best regards,

Vincent Xu

Hi Vincent,

Points 1,2,3,4 have been confrimed and still not work. Anyhow, thanks for your suggestion. I have setup two more machine on Windows 2003 server and

XP

pro, the Migration work without any problems. Then, I develop a backup

plan

(simply join domain manually and modify user profile path by registry) if any client machine cannot use ADMT to migrate to new domain.

Best regards,

Andrew

Hi,

OK, we go on checking following things:

1. If RPC service is started.
2. If firewall is disabled.
3. Turned off sid filtering in the source domain
4. Validate the trust between the two domains again.

Hi Vincent,

Here is my current situation.

Thanks for your suggestion.

Regards,

Andrew

Hi,

Some
thoughts:
1. Does
Windows
2000's
migration
properly?

I haven't tested 2000 client

2. Try to
join the
current user
account
(running
ADMT)
into the
workstations'
local

Re: Error on migrating XP client on NT 4.0 Domain into WINDOWS 2003 AD

Administrators
group.

I am using source domain
admins' group administrator
account to logon

ADMT

installed machine on target
domain, so it should be
alright as source
domain's domain admins
group should be added into
administrators group

on

XP

client machine

3. Try to
ping the
computer
name to see
if the name
resolution is

correct

from target
domain.

it OK.

4. If you are
using DNS,
please
check if
DNS
settings are
correct.

As I put every machine in
an isolated LAN, so DNS
should not be a

issue.

Any

Re: Error on migrating XP client on NT 4.0 Domain into WINDOWS 2003 AD

Re: Error on migrating XP client on NT 4.0 Domain into WINDOWS 2003 AD

way, I add this host record
into 2003 AD DNS but it
still not working

.<

Best
regards,

Dear
all,

My
company
currently
is
using
NT
4.0
single
domain
structure
with
NT

wk,

WIN2000
Pro,
and
XP
Pro
Client
PCs.
At
this
moment,
we
are

Re: Error on migrating XP client on NT 4.0 Domain into WINDOWS 2003 AD

planning
to
migrate
to
Windows
2003
AD

and

so

doing
test
on
ADMT
3.0
to
migrate
current
NT
domain
user
accounts,

group

and

computer
into
new
AD
domain
structure.
During
the
testing
phase,
we

find

that
we
could
not
migrate
XP
Client
computer

security
setting,
but

it

work

on
NT
client.
An
error
message
comes
up
during
the
Pre-Check
phase

on

the

Active
Directory
Migration
Tool
Agent
Dialog.
The
message
is
"ERR2:7666
Unable
to
access
server
service
on
the
machine
'xxx'.
Make
sure

netlogon

and

workstation
services
are
running
and
you
can
authenticate
yourself

to

the

machine.
hr=0x800706ba.
The
RPC
server
is
unavailable.

The
SP2
has
been
installed
on
XP
Client.
Two-ways
trust
has
been

built

between
source
and
target
domain.
Source
Domains'
domain
admins

group

has

Re: Error on migrating XP client on NT 4.0 Domain into WINDOWS 2003 AD

been
granted
administrators
right
on
target
domain;
and
Target
domains'
domain
admins
groups
has
also
been
granted
administrators
right
on

source

domain.

NT
WK
are
successfully
migrated
into
W2K3
AD
but
XP
client
cant,
any

idea

to

solve
this
problem.

Thanks
in
advance
