Hi,

Regarding printer server migration:

<<http://technet2.microsoft.com/WindowsServer/en/library/7f43ef1b-4f33-447b-b1b5-cbb159c30ddd1033.msp?mfr=true>>

Regarding share folder migration:

<<http://www.microsoft.com/windowsserver2003/upgrading/nt4/tooldocs/msfsc.msp>>

Hope this helps.

Best regards,

Vincent Xu

We have three servers running Windows 2000 and two running 2003. We have purchased three more copies of 2003 and want to upgrade the 2000 servers. However, I want to do a clean install.

They are all DC's but I have a master on one of the 2003 servers so I'm

not

worried about AD. What I AM concerned about, however, are the 60,200,021 shares/devices/etc (oh, ok, maybe I'm exaggerating a LITTLE.)

All of the servers have the OS installed on their "C:" drive with

EVERYTHING

else on D: and above. All of the shares, etc relate to folders on other logical drives. If I wipe out the boot "C:" drive I will lose all of these printer shares, shared folders, etc. How can I preserve them so when I cleanly install Server 2003 I can get them back? I don't want to have to redo 60,200,021 shares/devices/etc.

Bill
