Hi vincent,
What is this tool name, the link here is no longer valid. Is this tool called XCAL.exe ? thanks.

Vincent,

The Tool is so cool, we will use it to assign sid to all the folders

Thank you very much for all the helps. Hong

"Vincent Xu [MSFT]" wrote:

Hi,

I think it will be troublesome if you have lots of clients because you

have

to manually assign sid to all folders.

Check following tool:

RE: How to use ADMT3?

<<http://www.microsoft.com/downloads/details.aspx?FamilyID=e8ba3e56-d8fe-4a91>

-93cf-ed6985e3927b&displaylang=en>

to manage the ACLs on folders.

Hope it helps.

RE: How to use ADMT3?

RE: How to use ADMT3?

microsoft.public.windows.server.migration

Vincent,
Thank you
so much for
the
information.
But we can't
migrate a
new

user

account
anymore, it
was a mess.
The email
team
migrated
our user
accounts to
the new AD
tree before

the

network
team
migrate
them, since
the email
only need
the user
account

itself,

so the email
team did
not migrate
with SID
history, did
not perform

security

translation.....,
and they
thought the
network
team then

RE: How to use ADMT3?

just migrate

the

workstations.

(And the original ADMT machine is gone forever now)

Any suggestion on our situation? how to perform workstations

migration

with

SID history and user profile without user account migration? the

artical

for

"SID mapping file with the ADMT" sounds good, but I don't really

understand

how to do it, I don't know any VPScript at all, is any

RE: How to use ADMT3?

RE: How to use ADMT3?

other
resource

out

there have
more
details?
Many
thanks in
advance for
any idea.

We
will
need
to

RE: How to use ADMT3?

10

RE: How to use ADMT3?

migrate
our
domain
from
NT4.0
to
AD
(in
the
same

forest)

and

we
want
to
migrate
with
SID
history
and
also
the
"local
user

profiles".

The
main
problem
is:
we
have
the
user
accounts
already
in
AD
for

Email

only.

When
we
used

RE: How to use ADMT3?

ADMT2
to
do
the
migration,
it
failed
because
the

user

accounts

already
in
the
AD
(our
email
account
is
exactly
the
same
as
our

network

account),
we
don't
want
to
rename
any
of
them).
Then
we
try
to
use
ADMT3
(steps:
migrate
Global
group
-->
user

RE: How to use ADMT3?

accounts,

we

checked
box
of
"SID
history.."
-->
translate
local
user
profile,

we

checked

box
of
"user
profile"
-->
migrate
workstations,
we
didn't
check

any

boxes

-->
remigrat
global
group),
it
went
through
without
any
problem.

But

when

we

RE: How to use ADMT3?

login
the
new
domain
on
the
workstation,
(it
re-create
another

profile)we

lost
all
our
setting
-
desktop,
shortcuts,
printer,
access
to
the

old

domain

resource....
Anyway,
it
did
not
migrated
with
SID
history
and
the

user

profile
did
not
get
translated.
Is
any
one

RE: How to use ADMT3?

RE: How to use ADMT3?

there
know
what
did
we

do

wrong
on

the
ADMT3?
is
anyone
there
have
any
idea?
is
any
one
there
know

the

step

by

step
how
to
use
ADMT3?
any
advise
will
be
greatly
appreciated.

Hong
