Hi,

Check following tool:

<<http://www.ss64.com/nt/moveuser.html>>

Hope this helps.

Best regards,

Vincent Xu

I need to migrate user accounts from a member server in the domain to the domain AD DC. The accounts were created locally on the member server for

"FTP

only" users that are not "domain" users per say, but need access to an

FTP

location.

I am told by MS that no MS tool exists. Is anyone aware of a tool that

can

do this?

Any help is appreciated.
