Hello Burhan,

Thank you for using newsgroup!

From your post, you may use ADMT to migrate user account and password and

you may use File Server Migration Toolkit to migrate the file server.

Utility Spotlight – File Server Migration Toolkit

<http://www.microsoft.com/technet/technetmag/issues/2006/10/UtilitySpotlight/?related=/technet/technetmag/issues/2006/10/UtilitySpotlight>

Thanks & Regards,

Ken Zhao

| Hello Burhanm,

| Use ADMT 3. It will take over accounts, password, etc. to a new domain
and
| you still have access for your users after it.
