In news:uUq\$ywo7DHA.2656@TK2MSFTNGP11.phx.gbl,

Joe Ross <joeross252@hotmail.com> posted a question

Then Kevin replied below:

: "Kevin D. Goodknecht [MVP]" <admin@nospam.LSAOL.COM> wrote in message

: news:usDBeUm7DHA.804@tk2msftngp13.phx.gbl...

:: To ping by host name from a different domain you will have to add

:: abc.def.com to the domain search list in addition to the local

:: domain. (DNS tab) Default is to append Primary DNS suffix, to ping

:: both domains by hostname only you have to add both names to the

:: list. This can slow DNS resolution considerably because it will

:: append all queries.

::

:

: Instead of being able to ping all machines across domains (which would

: apparently have detrimental side-effects on our network), what if I

: want to be able to resolve certain machines (e.g. key servers) across

: domains. For example, is it possible to have all machines in DOMAIN1

: able to resolve SERVER1 in DOMAIN 2? I realize it is possible if I

: had a hosts entry to all machines in DOMAIN1, but I don't consider

: this a viable option. Is it possible to tell the DNS server in

: DOMAIN1 about this "special entry"?

:

: Thanks again Kevin,

: -joe

Windows server 2003 allows for conditional forwarding add the other domain to each DNS as a conditional forwarder.

If you want to ping by hostname without adding the domain to the search list you'll need a host file for it.

Use Outlook Express?... Get OE_Quotefix:
It will strip signature out and more

<http://home.in.tum.de/~jain/software/oe-quotefix/>

=====
Keep a back up of your OE settings and folders with
OEBackup:
