Andre,

Is Netbios over TCP/IP enabled on the Windows 2003 server on the NIC properties? You need this for pre-Windows 2000 machines to access files. I can't find a Windows 2003 article, but the following article for Windows 2000 outlines the problem you are seeing:

263648 Cannot View Windows 95/98 File Share from Windows 2000

<http://support.microsoft.com/?id=263648>

To stop the prompting for credentials, verify the XP client is a member of the domain and is logged into the domain and not just the local machine.

Best Regards,

Kristin Thomas, MCSE, MCP

microsoft.public.windows.server.networking: RE: win98 client cannot see a shared folder on a win server 2003

| I have a win98 client wich cannot log on to a shared
| folder on a win server 2003 machine. The folder is shared
| and the permission for it is set to 'Everyone' plus 'full
| control' The WinXP client have no problem (although they
| have to enter user name + password wich I would like to
| get rid of)

| I am new to win2k3 server

| I need help!!!
