Are you getting prompt for username and password when you connect to <http://localhost/backup> and <http://localhost/remote>?

This one may help

Add Local Service and Network Service account Read & Execute, List Folder Contents,
and Read permissions to %windir%\Microsoft.NET\Framework\v1.1.4322.
Add Local Service and Network Service account Full Control permission to
%windir%\Microsoft.NET\Framework\v1.1.4322\Temporary ASP.NET Files.

This will allow Backup and Monitoring folders under "Temporary ASP.NET Files"
folder to have full control for Local Service and Network Service.
