No one answered this so perhaps MS could.

Today I logged on as Administrator, clicked on Server Management then Backup. I usually read the backup report from the previous evening this way but this time I got a "You do not have the correct permissions to view this page. ... You must be a member of the Domain Admins security group." So I checked my security group settings and I am a member of this group, as well as Enterprise Admin, Builtin Admin, etc.

What can cause this problem and, more particularly, how do I resolve it?

Thanks,
... rick
