This exact same problem is happening to me. I think it's also preventing me from accessing some of the screens in the Server Management console. Look under today's posts at 5:36 a.m. for a couple possible answers. Still not working for me, but I haven't tried the most recent suggestion.

Bart

>Access to the

path "C:\WINNT\Microsoft.NET\Framework\v1.1.4322\Temporary ASP.NET Files\remote\3f1585d2\3070828a" is denied.

>Description: An unhandled exception occurred during the execution of the current web request. Please review the stack trace for more information about the error and where it originated in the code.

>

>Exception Details: System.UnauthorizedAccessException:

Access to the

path "C:\WINNT\Microsoft.NET\Framework\v1.1.4322\Temporary ASP.NET Files\remote\3f1585d2\3070828a" is denied.

>

>ASP.NET is not authorized to access the requested resource. Consider granting access rights to the resource to the ASP.NET request identity. ASP.NET has a base process identity (typically {MACHINE}\ASPNET on IIS 5 or Network Service on IIS 6) that is used if the application is not impersonating. If the application is impersonating via <identity impersonate="true"/>, the identity will be

the anonymous user (typically IUSR_MACHINENAME) or the authenticated request user.
