Hi Vic,

What is the meaning of " want to stop SBS trying to make remote calls from time to time "? Do you mean you have configured dial on demand to remote server?

Generally speaking, please delete the original dial-up connection and re-run CEICW will resolve this issue.

On other hand, have you backup the system before you change connection settings? If so, you can use the backup set to restore the system.

Please refer to the following KB:

Chapter 8 – Backup and Restoration
