Hi all, it seems that ISA seems to be blocking ftp transactions from clients. We have a remote FTP server on another remote network running on Windows 2000 & IIS 5. Clients from my SBS network trying to connect to it are failing. Here is a log from SmartFTP. Any ideas? Under Protocol Rules in ISA I have FTP, FTP Download Only & FTP Server checked.

Resolving host name ftp.mycompany.com...

Connecting to (ftp.mycompany.com) -> IP: 69.2.aa.bb PORT: 21

Connected to (ftp.mycompany.com) -> Time = 78ms

Socket connected waiting for login sequence.

220 webserver Microsoft FTP Service (Version 5.0).

USER lgdatacenter\sterling

331 Password required for lgdatacenter\sterling.

PASS (hidden)

230-welcome to ftp.mycompany.com

230 User lgdatacenter\sterling logged in.

SYST

215 Windows_NT version 5.0

FEAT
